

# ☆ PROFILE

- ✓ With 10+ years of experience building scalable web applications, specializing in React, Next.js, Node.js, and Python for AI/ML solutions.
- ✓ Strong expertise in modern technologies including TypeScript, Prisma, MySQL/PostgreSQL, and cloud platforms (GCP, Vercel, AWS).
- ✓ Proven track record implementing CI/CD pipelines and Agile/SCRUM methodologies to deliver highquality software faster.
- Skilled in designing and integrating REST & GraphQL APIs, ensuring seamless interoperability across systems.
- ✓ Proficient in Git-based workflows, fostering collaboration, efficient code management, and continuous delivery.
- √ Hands-on experience with Docker & containerized development, ensuring scalable and portable deployments.

# SOFT SKILLS

- ✓ Leadership
- √ Teamwork
- ✓ Problem Solving
- ✓ Focus on Results
- √ Responsible

# SENIOR FULL-STACK & AI ENGINEER.

Ing. Oscar Antonio Bonelli Nasta.

- ⊚ obonelli.dev github.com/obonelli Ø linkedin.com/in/obonelli

### **RELEVANT ACHIEVEMENTS**

- **Productivity Boost:** Automated workflows with Python & Node.js, improving efficiency by 30% across multiple teams.
- **E-commerce Growth**: Scaled platforms with React & Next.js, increasing online sales by 40% and enhancing UX.
- Al Integration: Delivered chatbots & recommendation engines using Python (FastAPI) & OpenAI, boosting engagement.
- Cloud Optimization: Migrated apps to Vercel & GCP, cutting infra costs while ensuring scalability.

#### **EDUCATION**

Superior Computer Systems (2008-2012) Cedip - Tampico, México. Master in quality and competitiveness (2014-2016) IEST Anáhauc - Tampico, México.

### **EXPERIENCE**

**Lead Full-Stack Engineer -** 06/2024 – 06/2025 (Fixed-term contract) **Cloud Transit Xchange** 

- Backend: Node.js (Express and Nest), Python (FastAPI), RESTful & GraphQL APIs.
- Frontend: React.js, Next js, React Native (Expo), Typescript
- **Databases:** MySQL (Prisma ORM), MongoDB (Mongoose), PostgreSQL (Sequelize, TypeORM, SQLAlchemy), Redis
- Cloud: AWS Lambda, Cloud Functions.
- **CI/CD**: CircleCI & GitHub Actions for automated deployments.
- Testing: Jest, React Testing Library, Enzyme.
- **Containers**: Docker & Docker Compose for containerized environments.
- Version Control: Git workflows for collaboration.
- **UI/UX**: Prototypes and wireframes in Figma with cross-functional teams.

#### **ACHIEVEMENTS**

- **Refactored legacy v1** under strict deadlines, enhancing functionality and strengthening codebase.
- Led the development of a next-generation version, mentoring junior developers while delivering an optimized UI and a scalable white-label system.
- **Streamlined UI development** by implementing Storybook, cutting component build time by 25%.
- Reduced **infrastructure costs by 20%** by migrating critical services to AWS Lambda and Cloud Functions.
- Improved **deployment frequency by 30%** through CI/CD automation.

# **CERTIFICATIONS**

#### **BY AWS**

- ✓ Cloud Practitioner Essentials
- √ Lambda Foundations

#### **BY LINKEDIN**

- √ <u>Javascript (Advanced)</u>
- ✓ Python (Advanced)
- ✓ <u>DevOps: Docker (Advanced)</u>
- ✓ Fine-Tunning for LLMs (Advanced)

#### BY HACKERRANK

- ✓ Problem Solving (Intermediate)
- √ Frontend Developer (React)
- ✓ Node.js (Intermediate)
- ✓ <u>SQL (Advanced)</u>
- ✓ Python (Basic)

## Lead Engineer- 05/2023 - 06/2024

#### **Persistent Systems**

- **Backend:** Node.js (Express, TypeScript), Python (FastAPI), development RESTful and GraphQL APIs.
- Frontend: Javascript, HTML, CSS, React.js, Next js, Redux, Typescript, Tailwind, Material UI, Consuming REST APIs and GraphQL using the Apollo Client.
- Databases: MySQL (prsima), SQLAlchemy, MongoDB (mongoose).
- **Testing:** Unit & integration testing with Jest; Storybook for centralized UI component management.
- Version Control: GitLab for collaborative workflows.
- Methodology: Agile/Scrum for efficient project delivery.

#### **ACHIEVEMENTS**

- Optimized API performance, improving response times by 40%.
- Increased test coverage from 60% to 90% with Jest, reducing bugs and improving reliability.

## Software developer- 08/2018 - 04/2023 Coppel

- **Backend:** PHP (Laravel), Node.js (Express), Python (FastAPI), Java (Spring Boot, Hibernate, Spring Batch).
- Frontend: React.js, React Native, Redux, TypeScript, Javascript.
- Testing & Automation: Jest, Junit, Selenium, Maven, Jenkins.
- Databases: MySQL, SQL Server, PostgreSQL, MongoDB.
- Containers: Docker & Docker Compose for containerized development and deployment.
- Cloud: Amazon Web Services (AWS).
- Data Processing: Worked with Apache Spark.
- **UI/UX:** Tailwind CSS, Less, CSS3, collaborated with UX team to enhance user experience.
- **E-commerce**: Maintenance and improvements of platforms optimized with React is and React Native apps.

## **ACHIEVEMENTS**

• Implemented a custom loyalty point system, boosting customer retention by 25% and increasing sales by 5%.

# **Software Engineer -** 04/2012 – Now

#### Self-Employed / Independent Contractor

- Backend: PHP, Java, Node.js, Python (Django, Flask, FastAPI).
- Frontend: React.js, AngularJS, JavaScript, jQuery, Less/Sass.
- Databases: MySQL, SQL Server, PostgreSQL, Mongo, DynamDB
- **Containers:** Docker & Docker Compose for containerized development and deployment.
- **AI/ML:** TensorFlow for model design, training, and deployment (classification, regression, computer vision).
- **Vector Databases:** Pinecone for production-ready semantic search and RAG pipelines demo proyect
- E-commerce & CMS: Built and customized platforms with JavaScript (React, Node.js), integrating APIs, payment gateways, and scalable front-end features, leveraging CMS solutions (WordPress, Joomla, Shopify) with custom themes and plugins.
- Developed tailored e-commerce platforms and admin systems for 50+ clients, **achieving 95% customer satisfaction**.
