

PROFILE

- ✓ Senior engineer specialized in **building integrations, workflow automation, and AI-driven systems** using React, Node.js, Python, and cloud platforms.
- ✓ Strong expertise in **modern technologies** including **TypeScript, Prisma, MySQL/PostgreSQL**, and **cloud platforms (GCP, Vercel, AWS)**.
- ✓ Proven track record implementing **CI/CD pipelines** and **Agile/SCRUM** methodologies to deliver **high-quality software faster**.
- ✓ Skilled in designing and integrating **REST & GraphQL APIs**, ensuring **seamless interoperability** across systems.
- ✓ Proficient in **Git-based workflows**, fostering collaboration, efficient code management, and continuous delivery.
- ✓ Hands-on experience with **Docker & containerized development**, ensuring scalable and portable deployments.

SOFT SKILLS

- ✓ Leadership
- ✓ Teamwork
- ✓ Problem Solving
- ✓ Focus on Results
- ✓ Responsible

SENIOR FULL-STACK

INTEGRATIONS, AUTOMATION & AI SYSTEMS

Ing. Oscar Antonio Bonelli Nasta.

bonelli.personal@gmail.com +52 833 208 79 65

obonelli.dev github.com/obonelli linkedin.com/in/obonelli

RELEVANT ACHIEVEMENTS

- Productivity Boost:** Automated workflows with Python & Node.js, improving efficiency by 30% across multiple teams.
- E-commerce Growth:** Scaled platforms with Shopify, React & Next.js, increasing online sales by 40% and enhancing UX.
- AI Integration:** Delivered chatbots & recommendation engines using Python (FastAPI) & OpenAI, boosting engagement.
- Cloud Optimization:** Migrated apps to Vercel & GCP, cutting infra costs while ensuring scalability.

EDUCATION

Superior Computer Systems (2008-2012)

Cedip - Tampico, México.

Master in quality and competitiveness (2014-2016)

IEST Anáhuac - Tampico, México.

EXPERIENCE

Software Engineer - 04/2012 – Now

Self-Employed / Independent Contractor

- **Backend:** PHP, Java, Node.js, Python (Django, Flask, FastAPI).
- **Frontend:** React.js, AngularJS, JavaScript, jQuery, Less/Sass.
- **Databases:** MySQL, SQL Server, PostgreSQL, Mongo, DynamoDB
- **Containers:** Docker & Docker Compose for containerized development and deployment.
- **AI/ML:** TensorFlow for model design, training, and deployment (classification, regression, computer vision).
- **Vector Databases:** Pinecone for production-ready semantic search and RAG pipelines [demo proyect](#)
- **E-commerce & CMS:** Built and customized platforms with JavaScript (React, Node.js), integrating APIs, payment gateways, and scalable front-end features, leveraging **CMS solutions** (WordPress, Joomla, Shopify) with custom themes and plugins.
- Developed tailored e-commerce platforms and admin systems for 50+ clients, **achieving 95% customer satisfaction**.

ACHIEVEMENTS

- **Delivered 50+** e-commerce platforms and admin systems, reaching 95% client satisfaction.
- Created and integrated APIs and web services, reducing data transfer **times by 30%**.
- **Built 20+** custom plugins, themes, and payment gateways, supporting thousands of secure transactions.

Lead Engineer- 08/2023 – 05/2025

Persistent Systems

- **Backend:** Node.js (Express, TypeScript), Python (FastAPI), development RESTful and GraphQL APIs.
- **Frontend:** Javascript, HTML, CSS, React.js, Next.js, Redux, Typescript, Tailwind, Material UI, Consuming REST APIs and GraphQL using the Apollo Client.
- **Databases:** MySQL (prisma), SQLAlchemy, MongoDB (mongoose).
- **Testing:** Unit & integration testing with Jest; Storybook for centralized UI component management.
- **Version Control:** GitLab for collaborative workflows.
- **Methodology:** Agile/Scrum for efficient project delivery.

ACHIEVEMENTS

- Optimized API performance, **improving response times by 40%.**
- **Increased test coverage from 60% to 90%** with Jest, reducing bugs and improving reliability.
- **Designed reusable UI components with Storybook**, standardizing UI patterns across teams.
- **Designed reusable UI components with Storybook**, standardizing UI patterns across teams.
- Implemented **GraphQL query optimizations**, reducing over-fetching and improving frontend performance.
- Collaborated with QA and backend teams to define **contract-first APIs**, reducing integration issues.

Software developer- 08/2018 - 04/2023

Coppel

- **Backend:** PHP (Laravel) Eloquent ORM, Node.js (Express), Python (FastAPI), Java (Spring Boot, Hibernate, Spring Batch).
- **Frontend:** React.js, React Native, Redux, TypeScript, Javascript.
- **Testing & Automation:** Jest, Junit, Selenium, Maven, Jenkins.
- **Databases:** MySQL, SQL Server, PostgreSQL, MongoDB.
- **Containers:** Docker & Docker Compose for containerized development and deployment.
- **Cloud:** Amazon Web Services (AWS).
- **Data Processing:** Worked with Apache Spark.
- **UI/UX:** Tailwind CSS, Less, CSS3, collaborated with UX team to enhance user experience.
- **E-commerce:** Maintenance and improvements of platforms optimized with React.js and React Native apps.

ACHIEVEMENTS

- Enhanced e-commerce platform, **increasing sales by 5%.**
- Implemented custom loyalty system, **boosting retention by 25%.**
- Optimized backend queries, reducing **response times by 25%**
- Leveraged AWS for scalability and reliability, **achieving 99.9% uptime.**
- Redesigned UI with UX team, **improving satisfaction by 30%.**
